## ■ ■ Product Overview

The CloudEngine S5732-H-V2-G series switches are a new generation of 10-gigabit multi-rate switches launched for the Wi-Fi 6 era, providing rich features including service travel, VxLAN, iPCA, etc., to build high-quality campus bearer networks for customers in the Wi-Fi 6 era. Based on the feature of service accompanying, it provides users with consistent business experience in the whole network; VXLAN is used to realize network virtualization, realize "one network with multiple functions" in the park network, and save network construction cost; Based on the above features, S5732-H-V2-G series full 10-gigabit multi-rate switches can be suitable for aggregation/access of medium and large campus networks and small and micro data center access scenarios.
